

POLYMER CHEMIST

JOB DESCRIPTION:

Hydromer, Inc., a Branchburg, NJ based company, is engaged in the development of polymeric complexes for commercial use in the medical, industrial, cosmetic and animal health markets. As a polymer chemist in our R&D Group, you will be responsible for:

- The synthesis and analysis of new polymer formulations, as well as updating existing formulations for our business units.
- Providing and maintaining detailed documentation and procedures for all work performed.
- Managing documents, information and projects in electronic format and laboratory notebooks.
- Interfacing with multiple functions including upper management, sales/marketing, regulatory, quality and manufacturing.

QUALIFICATIONS:

- Ph.D. in Chemistry
- Minimum of 3 years experience in polymer synthesis and coating field
- Possess hands-on analytical equipment capabilities (GC, FTIR, etc.) – along with wet chemistry experience
- Must be detail oriented, highly organized and possess excellent oral, written and interpersonal skills
- Must be a self-motivated professional able to work under minimal supervision
- Computer literacy a must

All work is performed at our Branchburg, N.J. facility. We offer a competitive salary - in addition to medical, dental, prescription, life insurance, 401k plan, 11 paid holidays, paid vacation and more. Qualified candidates should forward their resume to:
