FIRST RESPONDER™
Alcohol-Based
Sanitizing Wipes

Our First Responder® multi-purpose wipes is a 2 part ,disposable wiper and bucket system with 80% denatured, activated charcoal filtered ethyl alcohol, that can be added once you are ready to use the wipes! This system is great for any business and personal sanitizing needs. These wipes are safe and effective for killing 99.9% of germs on most hard surfaces and hands. This eliminates the need for multiple sanitizing items. Intended for use in medical settings, public areas, homes, offices, gyms, cars, and more! Intended use on hands and hard surfaces. Our 80% ethyl alcohol content meets the CDC recommendation to kill COVID-19 virus.

Each bucket contains 6" x 12" x 180 sheets, and comes with 6 refillable rolls, in a case, perforated and 2.5 gallons of First Responder alcohol sanitizing solution. Each roll should be mixed with approximately 1.5 quarts of our alcohol solution for best results. Best used for hands, hard surfaces, keyboards, door handles, elevators, hand rails, appliances, bathroom fixtures, machinery, etc. Our 80% denatured ethyl alcohol is manufactured in our FDA registered/ISO certified facility.

CDC Disclaimer:

Current FDA guidelines recommend using 80% ethanol to best address Covid-19. Our ethanol is a plant-based alcohol, made with corn from the USA. CDC says that "While the exact role of direct and indirect spread of corona viruses between people that could be reduced by hand hygiene is unknown at this time, hand hygiene for infection prevention is an important part of the U.S. response to the international emergence of COVID-19.
